

**Reconnecting the  
Focal Meter**

**The Focal Meter in your  
home is currently offline,  
let's get that Meter back in  
action with these quick and  
simple steps!**

**Step 1:**  
**Check the indicator lights on**  
**the Focal Meter.**  
**It should have a**  
**solid green light**

**The indicator lights on the Focal  
Meter are located near the power  
connector**

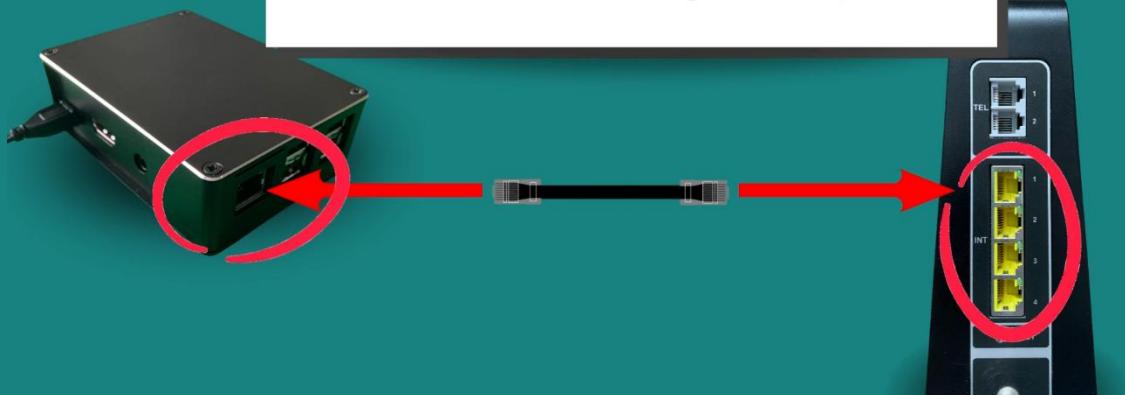

## Step 2:

If there aren't any lights,  
connect the Focal Meter to  
power

**Step 3:**  
**If there is a flashing red light, check the connection of the ethernet cable with the broadband router**

Connect the Focal Meter to your Internet Router with the ethernet cable into a free yellow port

**Step 4:**  
**If there is a solid red light,  
unplug the Focal Meter from  
the power connector, wait 5  
seconds, then reconnect**

**After completing these  
steps within 5 minutes the  
Focal Meter should have a  
solid green light and is now  
running correctly**
